

PhotoStory 3

Begin a new story

Import pictures (be sure to import resized pictures)

Rearrange pictures if necessary

Edit pictures if necessary

Add text to pictures if desired (note: be sure to use contrasting text color)

Record narrative next if desired

Be sure volume is maxed

Preview the slide with sound.
(If you don't hear sound in the preview, check the sound & audio device in the control panel and be sure the internal microphone is selected and all volumes are set to the max.)

Next you can *select* or *create* your own music. If you choose to insert music, it will automatically play throughout the slideshow; however, you can manually delete the music on the slides that have narrative.

Next, *save your story to playback on your computer*. Save this in your home directory (browse to your home directory). After the file has saved in the *wmv* format, click on *EXIT*. The program will now prompt you to save the PhotoStory in a format that can be edited in the future. – select *yes*, and save the *wp3* format in your home directory.
